## THE TRUE MEMECOIN

This token here marks the end of all meme coins. Meme coins have had a massive impact in the crypto space and have been a big source of income for many people.

We want to return to the days when meme coins truly delivered on the humor and fun they promised. However, we also aim to ensure the project's longevity and build solid utility.

Let's be honest. Many developers don't care anymore. They've picked up a bit of Remix and act professional in Telegram or Discord, only to pay exorbitant amounts for CoinMarketCap listings, appear briefly on VC during launch, and then disappear with the marketing funds or liquidity.

**STORY  
BEHIND  
SPODERMAN**

## HOW IT STARTED

The Spoderman team came into life after witnessing 1000s of rugs, failed launches, developers with no clue on how to run the project other than 2 mins of Remix Solidity knowledge. We had worked on many tokens before and decided it was time we created our own.

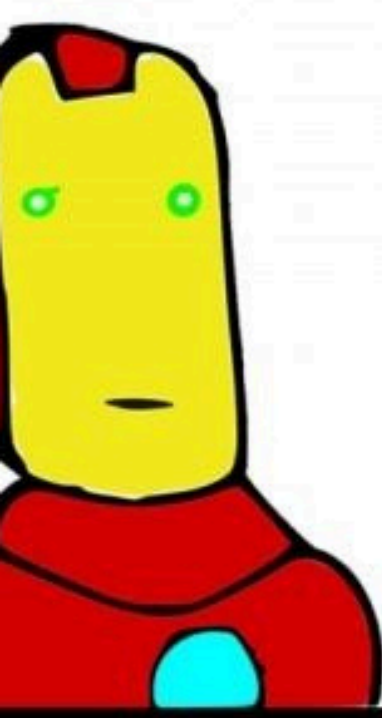

## WHY SUPER MEME?

"Meme tokens were inspired by the success of DOGE coin, which brought together meme enthusiasts from all over the world. The community was fantastic and remained active regardless of price fluctuations.

That's why we've chosen a super meme approach to create the funniest, most meme-filled community, aiming to revive the days when meme coins were all about the memes. We believe that by being unique and true to the original spirit of meme coins, we can gain a marketing edge, as effective marketing is about doing something simple yet different from the rest."

"It's amazing how people's minds work when they look at a chart. One moment they're spreading FUD when it's red, and the next they're praising the developers when it's green. ^^"

- Mobby Taguire 2022

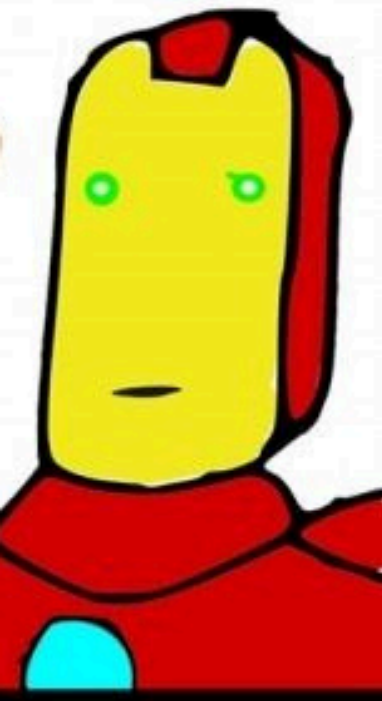

# WHY ETHEREUM MAINNET?

Ethereum is the king of all chains. It's highly scalable and its price is relatively stable, allowing it to endure bear markets. Millions of people are already involved with or knowledgeable about Ethereum.

Now that cheaper transaction gas solutions are implemented, we believe Ethereum will dominate all smart chains. Investors in Ethereum tend to be more patient compared to those in other smart chains. Most importantly, Spoderman token is here for the long term.

## TARGET

Our goal is to be the most premium, high-effort, and funniest meme token in crypto history. We aim to make a real impact while remaining transparent, active, and fair to all our investors.

We adhere to the KISS principle: Keep It Simple, Stupid. Many developers create tokenomics with exorbitant taxes, which deter potential investors.

We want to return to simplicity, keeping taxes super low with reflections to ensure maximum fairness and support for the community.

**OUR  
CORE  
VALUES**

## TRANSPARENCY

Our contract will be accessible on Telegram before launch and will undergo verification and auditing. Additionally, we will address any inquiries about the contract, Tokenomics, and utility through AMA sessions or announcements.

## FAIRNESS

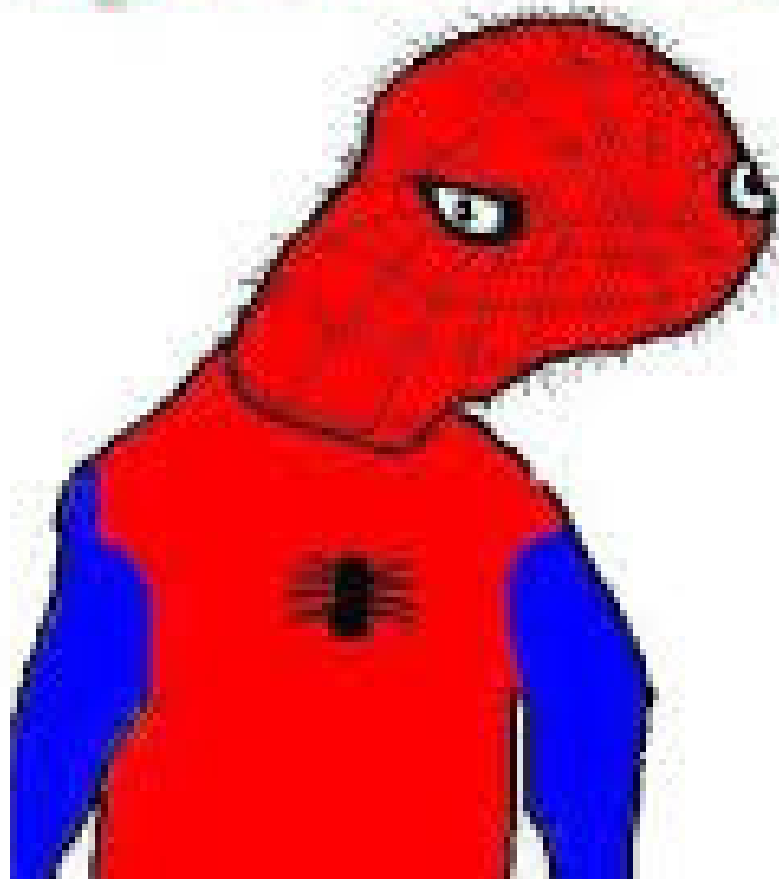

We do not hold any team tokens. our launch is 100% fair with anti snipe and anti whale measures. The only way for the team to gather more tokens will be via launch and future utility revenue

## INNOVATION

Innovation will ultimately define the longevity of tokens. We will explore avenues to enhance innovation within the token by introducing additional features, tailored to the community's needs and preferences through the governance system.

# COMMUNITY GOVERNANCE

As a holder of our community you will be able to gain insides on the team's next few ventures, decide change in tokenomics, decide the investment ,assets, goals or targets and have the power to make real decisions for the community.

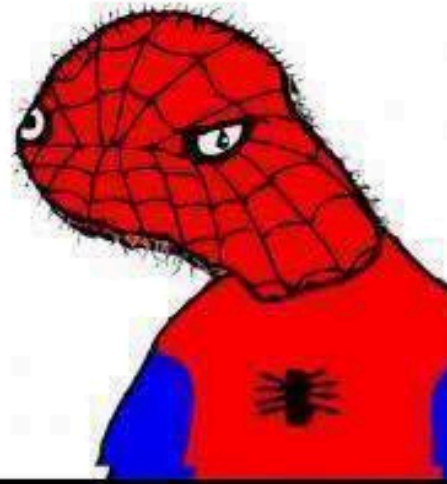

"IF I HOLD A TOKEN, I SHOULD HAVE THE POWER TO MAKE DECISIONS THAT CAN FURTHER POSITIVELY IMPACT THE COIN'S FUTURE. WHY DON'T OTHER DUMBASS DEVS REALISE THIS?"

**INTO THE  
MEMEVERSE**

# SPODERVEST

A certain amount of tax from buy and sell will be sent to a treasury wallet. The treasury wallet will be used to power our future investments. All of this will be decided via governance DAO, the dao will have a list of polls and the holders will be able to vote on what they would like to invest in for the future.

## SPODER BOARD

A portfolio board DAPP will be developed to display where the community has allocated their investments. It will showcase evidence of buying/selling various assets, including NFTs, staking, or purchasing the top 100 cryptocurrencies. Additionally, it will offer charts detailing profits and losses from the webfund investments.

## **MARKETING 3%**

Our marketing fee will be 3% both for buy and sells. It will be used for advertisements, partnerships and for delivering products or services.

## **SPODERVEST 3%**

This tax collects a fee to the treasury, which will then be invested depending on outcome decided via the governance on the DAO.

## **LIQUIDITY 2%**

2% of each buy and sell will go the liquidity to keep our trading volume strong.

## **SIMPLICITY IS KEY**

We have decided to go with an extremely low tax system . Reason being simplicity, we believe simplicity is absolute key. No one likes being taxed a huge sum which has been proven time and time again, especially when you want to attract a new set of investor from a consolidation cycle, its important to keep it simple and have a low tax.
